AGH University of Science and Technology
Sep 2020 – present
Information Technology

Skills

Advanced	C# .NET CORE Angular THREE.js
Intermediate	English (fluent) C# .NET Framework SQL Server HTML/CSS NUnit / Selenium GIT
Beginner	Node.js

Work experience

Netsoftware
Full-Stack Developer
Sep 2018 - Present

Projects:
Profis MSE (.NET CORE, angular, THREE.js) - unique digital web platform with ability to run engineering analysis in 3D. Main duties were to create various 3D tools for visualization and management of constructions, backend management with SQL Server and SQLite with entity framework core. Communication between via HTTPS and WebSockets with SignalR. Along with this software, I have created also:
A) additional offline version by hosting web services inside Winforms application.
B) External plugins for Autodesk REVIT and Bentley STAAD.PRO (.NET Framework).

EasyTrain (.NET CORE) - software for creating instructional videos from various web pages by recording user steps and replicating them using windows function and chromium events. Main duties were building, implementing and supervising the content and three people team. Project got multiple nominations and awards inside HILTI organization.

CDI (outsourcing)
Full-Stack Developer
Nov 2021 – Present

Project:
Unilabs (ASP.NET, .NET CORE) - web platform for managing prescription and laboratory orders with laboratories located in Switzerland and Norway. Main duties were upgrading to new IdentityServer4, managing search engine ElasticSearch and background task with Hangfire.
